DAIRY STATISTICS.

The most reliable statistics give Pennsylvania the following figures as representing our dairy products:

Number of cows,	927,254
Gallons of milk produced on farms,	368,906,480
Pounds of butter made on farms,	76,809,041
Pounds of butter made in creameries,	19,390,387
Pounds of cheese made on farms,	439,060
Pounds of cheese made in creameries,	5,018,837

For the purpose of comparison, the following figures referring to periods of ten years each since and including 1850, are interesting:

	Cows.	Pounds of butter.	Pounds of cheese.	Gallons of milk per cow.
1850,	530,224	33,878,418	2,505,034	231.1
1860,	673,547	58,653,511	2,508,556	265.6
1870,	706,437	60,834,644	2,792,676	280.6
1880,	854,156	80,322,852	8,966,737	322.8
1890,	927,254	96,199,428	5,457,897	397.8

During the same period of 50 years the number of cows to each 1,000 of population, has been as follows:

1850,	229	1880,	199
1860,	232	1890,	176
1870,	201		

The number of Pennsylvania cows, compared with those of the United States is shown by the fact that in Pennsylvania there were, in 1890, 176 cows to each 1,000 of population, while in the United States the proportion was 264 to each 1,000 of population.

Similar statistics for the United States give the following figures:

Value of products made,	\$62,686,043

The decrease in the amount of cheese made on farms is shown by the following figures:

1850,	105,535,893 pounds.	1880,	27,272,489 pounds.
1860,	103,663,927 pounds.	1890,	18,726,818 pounds.
